## Cyclobenzaprine tablet

### What is this medicine?

CYCLOBENZAPRINE is a muscle relaxant. It works by blocking nerve impulses (or pain sensations) that are sent to your brain.

Cyclobenzaprine is used together with rest and physical therapy to treat skeletal muscle conditions such as pain or injury.

Cyclobenzaprine may also be used for purposes not listed in this medication guide.

### What should my health care professional know before I take this medicine?

Do not use cyclobenzaprine if you have taken an MAO inhibitor in the past 14 days. A dangerous drug interaction could occur. MAO inhibitors include isocarboxazid, linezolid, phenelzine, rasagiline, selegiline, and tranylcypromine.

You should not use cyclobenzaprine if you are allergic to it, or if you have:

- a heart rhythm disorder, or you have recently had a heart attack;
- congestive heart failure;
- heart block; or
- a thyroid disorder.

To make sure cyclobenzaprine is safe for you, tell your doctor if you have:
